## 30 Day Public Notice Report

---

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director  
Division of Water  
Room W264  
402 West Washington Street  
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water  
Room W264  
402 West Washington Street  
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : FW-24963

Stream : Killbuck Creek

Applicant : Madison County Highway Department  
Charles Leser  
2830 West Eighth Street  
Anderson, IN 46011-1949

Description : The existing steel truss bridge carrying Grand Avenue over Killbuck Creek will be replaced with a new structure on essentially the same alignment to improve traffic flow. The new structure will be a 1-span continuous prestressed concrete I-beam bridge with span length of 86 ft. The structure will have an out-to-out length of 43'-4" and a clear roadway width of 26 ft. The spill through abutments will have 2:1 sideslopes armored with revetment rip-rap over a geotextile fabric. The abutments and piers will have no skew. The new approach roads will be on the same elevation as existing approaches. The existing structure will be completely removed. Details of the project are contained in information received electronically at the Division of Water on August 22, 2008 and in plans and information received at the Division of Water on

Application # : FW-24964

Stream : St. Joseph River

Applicant : Sisters of the Holy Cross  
Tom Stimson  
Saint Mary's  
Lourdes Hall 100  
South Bend, IN 46556

Description : Approximately 70' of river bank along the St. Joseph River will be stabilized using a rock toe consisting of large boulders and rip rap and up to eight soil encapsulated lifts on top of the rock toe. The lifts will be vegetated with native prairie and native shrubs. Geogrid will be installed in the lifts for structural stability. The remainder of the slope will be backfilled to near preexisting grade, seeded with prairie grasses, and covered with an erosion control blanket. The slope will then be pinned with live stakes to decrease the likelihood of the fill migrating downslope. Surface water runoff from above will be captured in a Water and Sediment Control Basin (WASCOB) and the water piped to the bottom of the slope (under the backfill and lifts proposed above) to eliminate potential scour on the new slope surface. Details of the project are contained in information received electronically at the Division of Water on August 22, 2008 and in plans and information received at the Division of Water on

Location : Approximately ½ mile west of Business 31/933 and 100 feet south of Le Mans Dr, the project site is located on the north bank of the St. Joseph River.
